Getting More from JewishGen

Michael Marx

Sunday, January 8, 2006

1:30–4:30 PM

Temple Emanuel, Newton Centre

By now most genealogists have discovered the premier Jewish genealogy web site—JewishGen.org. In this presentation, Michael Marx will lead you through an exploration of the vast resources of JewishGen. Beginners as well as intermediate users will learn how to get more out of the many information files, extensive databases, discussion groups, tools, and other facets of this phenomenal, user friendly web site.

Marx, a member of JGSGB, has been interested in genealogy since he retired in 2000. He now has over 1500 people in his family tree. He frequently used the resources available on JewishGen to further his research, and he found the site to be the most useful internet source for Jewish genealogy.

Following the presentation, attendees will have a chance to participate in small discussion groups based on their genealogical interests.
